

What We Provide

A COMPASSIONATE APPROACH

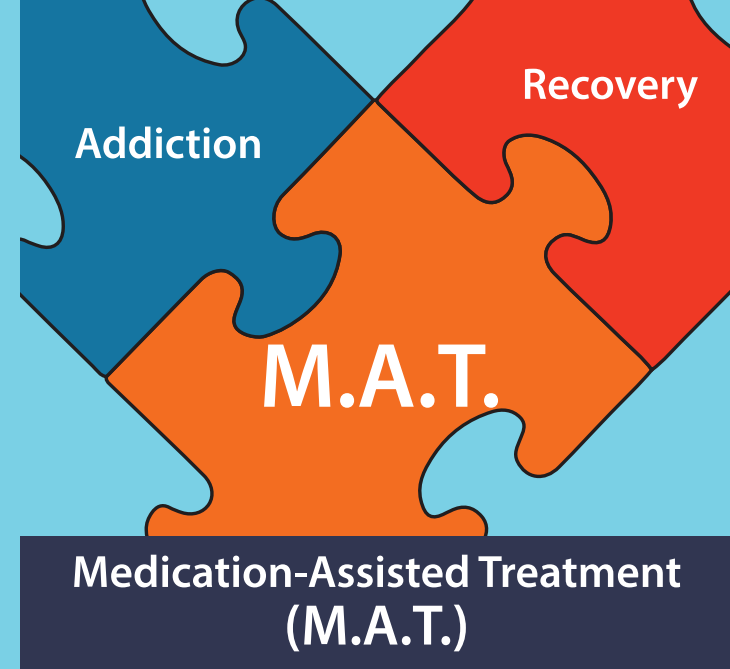

Substance use disorder is a treatable chronic health condition from which people can and do recover. COMC provides a team of providers and staff members who deliver expert assistance that is judgement free. They accept people wherever they are in their recovery journey.

They are dedicated to helping you reach the goals you have set for your life by creating a treatment plan that best fits your needs.

There is HOPE You are NOT ALONE

We help people who are dependent on all types of substances, including alcohol, cocaine, methamphetamine, marijuana, and opioids.

Central Ozarks Medical Center has been providing quality health care in Central Missouri since 1979. Our mission is to increase access to comprehensive primary and preventative health care and to improve the health care status of underserved and vulnerable populations in Camden, Laclede, Miller, Morgan, and Pulaski Counties.

MAT HAS BEEN SHOWN TO...

Improve patient survival

Increase retention in treatment

Decrease illicit opiate use and other criminal activity among people with substance use disorders

Increase patients' ability to gain and maintain employment

Improve birth outcomes among women who have substance use disorders and are pregnant

Addiction Is A Disease

Opioids are highly addictive, and they change how the body and the brain works. It can cause difficulties with tasks at work, school, or home, and can affect someone's ability to maintain healthy relationships. A substance abuse disorder can affect anyone from any type of background. It can even lead to overdose and death. Anyone can become addicted, even when opioids are prescribed by a doctor and taken as directed. BUT, recovery *is* possible.
